SUMMARY

Software Engineering student and aspiring AI Engineer. I have good knowledge of Python and basic experience in Generative AI and Agentic AI. I enjoy building AI-based projects like chatbots and RAG systems. I also have skills in backend and frontend development. I am looking for an AI internship to improve my skills and work on real-world AI projects

PROFESSIONAL EXPERIENCE

AI & Software Development Projects

Self-Directed Learning

06/2023 – Present
Karachi, Pakistan

- Learning and building projects in AI and software development using Python.
- Working on Generative AI and basic Agentic AI concepts through simple AI workflows.
- Developing backend applications using Python and improving problem-solving skills.
- Building responsive web applications using HTML, CSS, and JavaScript.

EDUCATION

Bachelor of Science in Software Engineering

Sindh Madressatul Islam University, Karachi

02/2023 – Present
Karachi, Pakistan

- Studying Software Engineering with focus on programming and web development.
- Learning Python, JavaScript, HTML, and CSS through academic and personal projects.

SKILLS

AI & Machine Learning

Generative AI, Retrieval-Augmented Generation (RAG), Vector Search (FAISS), Prompt Engineering, Large Language Models (LLMs)

Programming Languages

Python, JavaScript (ES6+), HTML5, CSS3

Software Engineering & Tools

Git, GitHub, Streamlit, Gradio, Vercel

LANGUAGES

English

Urdu

CERTIFICATES

Legacy Responsive Web Design V8 (freeCodeCamp): 🏆 Completed coursework in responsive web design. | Learned HTML5, CSS3, Flexbox, and CSS Grid. | Built multiple responsive web projects as part of certification requirements.

PROJECTS

RAG Document QA System (GROQ+ FAISS) 🏆

04/2026

AI & Python Project

- Built a RAG system that allows users to upload PDFs and ask questions using AI.
- Processed and converted text into embeddings using SentenceTransformers.
- Stored embeddings in FAISS for fast similarity search and retrieval.

- Integrated Groq API (Llama 3.1) to generate accurate, context-based answers.
- Deployed using Streamlit.

Intelligent Groq Chatbot [↗](#)

05/2025

Generative AI Project

- Built a real-time chatbot using Groq API and Llama-3 model.
- Maintained conversation history for multi-turn chat context.
- Designed and deployed UI using Gradio.
- Hosted on Hugging Face Spaces.

Advanced Currency Converter [↗](#)

05/2025

Python Project

- Built a real-time currency converter using Streamlit and REST APIs.
- Used caching to improve performance and reduce API calls.
- Implemented session state for user interaction tracking.
- Integrated live exchange rate data using Python requests.

RedStore – E-Commerce Frontend Platform [↗](#)

May/2024 – May/2024

Frontend Project

- Built a responsive multi-page e-commerce website using HTML, CSS, and JavaScript.
- Designed product pages, cart system, and UI components.
- Ensured mobile, tablet, and desktop compatibility.
- Deployed on Vercel.

CORE COMPETENCIES

- Strong problem-solving and logical thinking skills
- Continuous learning and interest in AI technologies
- Experience working with Git and collaborative development
- Ability to build and improve software projects independently
